REFRATECHNIK

Instructions
eDrawings Viewer

These brief instructions are designed to make it easier for you to work with the
eDrawings files. If you have not yet downloaded and installed the eDrawings software,
you can do so by clicking on the following link: ▶ Download eDrawings Viewer
The eDrawings files (.eprt, .easm oder .edrw) can then be opened simply by
double-clicking on them.

The eDrawings Viewer is very simple to use and is great fun.
Please follow the next steps.

The top part of the page has standard tools such as ZOOM, ROTATE and MOVE.

Use the PLAY button to activate an automatic movement sequence.

The standard views can be activated using the following tools:
(If the tools are not available to you, you can activate them by clicking on
"View" "Toolbars")

Use these tools for MEASURING and SECTIONING.

or   If the eDrawings file has more than one configuration,
they are activated by the button on the left margin or at the bottom via the tabs.

This tool can be used to move individual parts.
Therefore, it a group of components can be disassembled.

The START button can be used to activate the assembly of a group of components
and to display the file as after opening.

Please use this tool if you would like to send us any information,
a drawing or a request for modification.

You can print the eDrawings file or save it as a JPG, TIF or GIF file.

Please do not hesitate to contact us if you have any further questions.
